

writing a blog post.

Getting Started. using the wordpress admin fields.

use the menu in the admin section to add a new post.

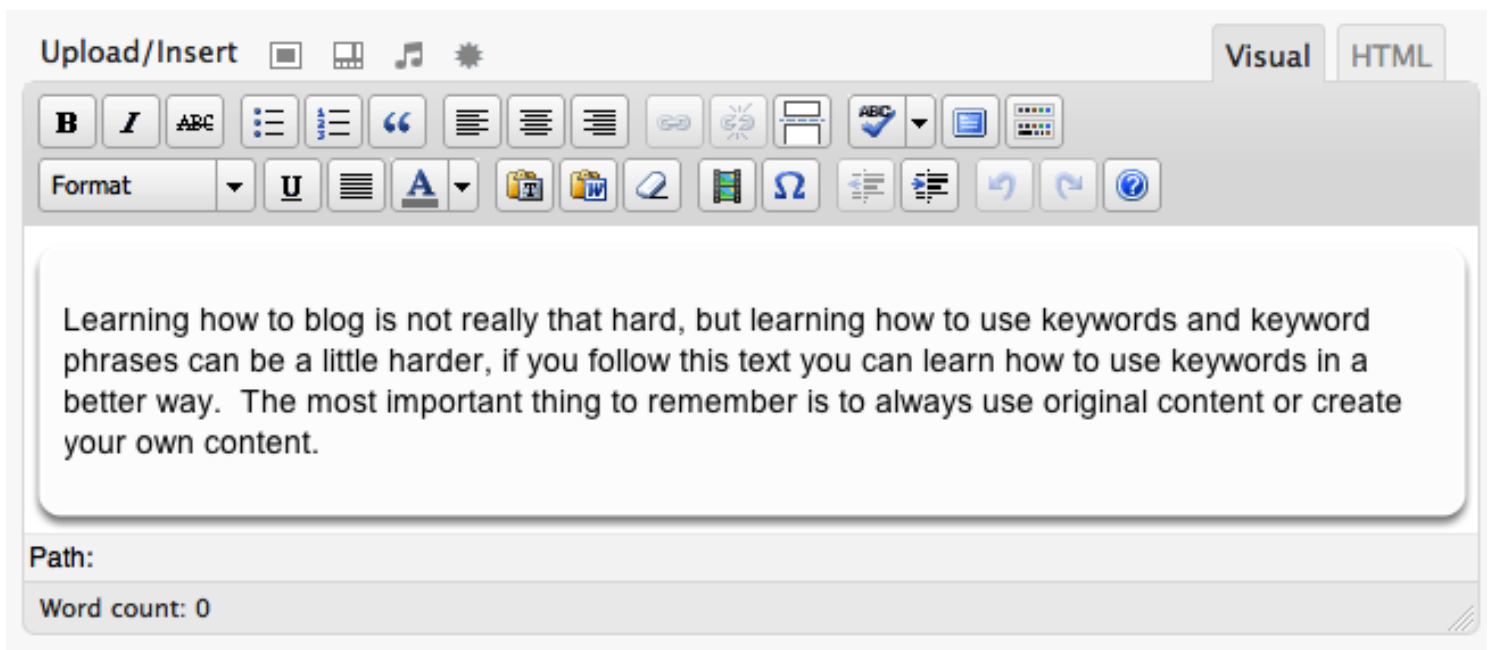

Just click on the add new link and your screen will go to the add new post menu.

Generate a title.

Enter the title of your post or article, this is where you would put, a four or five word title, that lets the reader know about the topic you are writing about.

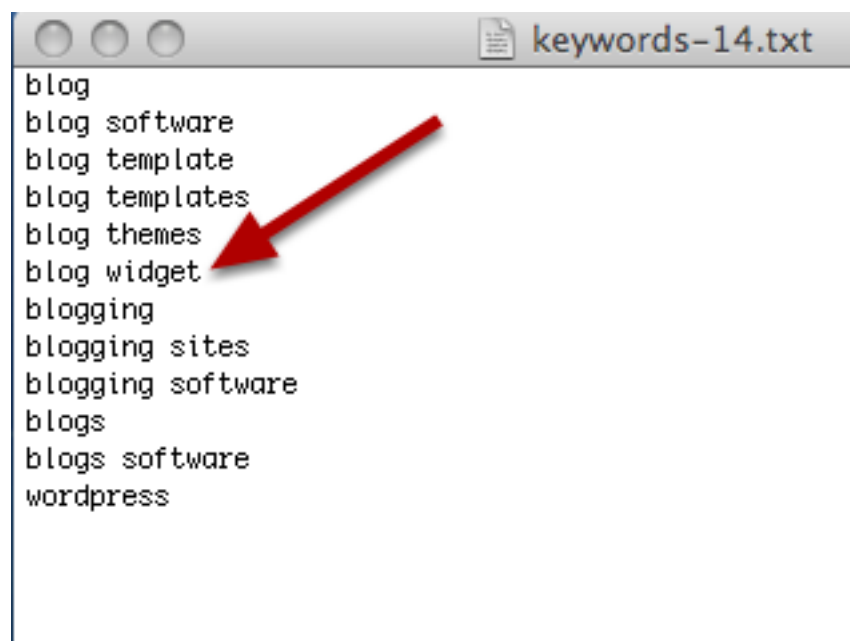

Writing a good body.

The screenshot shows a rich text editor interface. At the top, there is a toolbar with various icons for text formatting and insertion. Below the toolbar is a text field containing the following text: "Learning how to blog is not really that hard, but learning how to use keywords and keyword phrases can be a little harder, if you follow this text you can learn how to use keywords in a better way. The most important thing to remember is to always use original content or create your own content." Below the text field, there is a "Path:" label and a "Word count: 0" indicator.

So you can see that by typing into the text field, you can begin to create your article and by using keywords you can begin to build a better website

using keywords in your article.

```
keywords-14.txt
blog
blog software
blog template
blog templates
blog themes
blog widget
blogging
blogging sites
blogging software
blogs
blogs software
wordpress
```

A red arrow points to the keyword "blog widget" in the list.

Lets make an example of how to use keywords in your blog or website articles.

blogging, Blog widget, Blogging sites, blogging software, wordpress,

Now we are going to use each of these keywords in a short article. lets start with the first keyword, (blogging)

Blogging is not as easy as you might imagine at first glance, but it can be very rewarding, more so if you use **wordpress**, or other **blogging sites**, like

hub pages, or type pad, blogger blogs, and actually hundreds of other sites including websites like face book, and many others.

Blogging software , like wordpress is usually free however there are many different types of **blogs software** out there.

As you can see it is not that hard to blog with SEO and keywords in mind, see our lesson on getting keywords at [our website](#).
